

Azure Strategy Accelerator Free Two-Hour Workshop

Unlock the full potential of Microsoft Azure with Advania's complimentary two-hour workshop.

Join Advania's Azure Pre-Sales Solution Architect James Hollins, an experienced Azure adoption expert renowned for his extensive hands-on and real-world expertise. With a proven track record of leading numerous successful Azure implementations, James is committed to empowering leaders with real world insights and strategic cloud adoption guidance.

This session is crafted for organisations that have already invested in or are considering the adoption of Microsoft Azure cloud services.

What to expect in the workshop

In this workshop, James will delve into key Azure concepts, best practices, and strategic application. The focus will be on **solving critical business challenges** using Azure. This session is designed to equip you with practical solutions and strategic insights that can drive your organisation's digital transformation and enhance your competitive edge.

Whether you are exploring Azure for the first time or looking to deepen your strategic understanding, this workshop promises to deliver valuable takeaways tailored to your leadership role.

We encourage you to ask questions, share your experiences, and actively participate to maximise the benefits of this opportunity.

Why take the workshop?

- Get expert guidance on designing, implementing, and optimising your cloud investments
- Learn how to incorporate key cloud concepts into reusable architectures
- Avoid common cloud mistakes by leveraging the knowledge and experience from a cloud expert
- Get recommendations on achieving the right cloud outcomes

Architecture

- How and where to innovate in the cloud
- Why Implementing cloud governance and management is essential
- Business plans change, cloud services evolve, why architecture reviews save you money and headaches
- Addressing the differences between availability and recoverability and how it impacts your cloud model

Cloud Adoption Strategy

- Cloud data centre or cloud native, understanding your motivations
- Cloud readiness assessments, preparing to operate
- Conducting regular cloud strategy reviews with the broader organisation
- Measuring business outcomes of cloud investments

Landing Zone

- Adopting and maintaining best practices to secure investments
- The value of embedding secure by design or zero trust into your Landing Zone
- Building an agile foundation that evolves to meet new business needs

FinOps

- The criticality of resource organisation and tagging
- Implementing near-real time usage and billing insights
- Assessing for FinOps maturity
- Low hanging fruit to edge cases, automation to transformation

Security

- Understand the risks to your organisation and secure against them
- Why implementing secure cloud baselines is paramount
- Ensure you have the appropriate cloud security technologies in place

Don't miss this opportunity to elevate your cloud strategy and drive innovation through this transformative two-hour workshop and unlock the full potential of Microsoft Azure.
